

Ask your patients and caregivers to sign up for

BE CONNECTED

with CABOMETRYX[®] (cabozantinib)

A FREE SUPPORT PROGRAM

with tools and resources to help educate patients and caregivers during treatment with CABOMETRYX

BE CONNECTED will send them several communications over 3-4 months, however they choose: email, email and postal mail, as well as text.

Inside, you will find:

- Details about BE CONNECTED communications and how they provide an extra layer of education for your patients taking CABOMETRYX and their caregivers
- Tear-away BE CONNECTED sheets for patients and caregivers to sign up in-office or at home

From a doctor who encourages his patients to sign up for BE CONNECTED:

“The CABOMETRYX BE CONNECTED program is especially useful to a number of our patients. The support they provide, the education... [It] really does benefit patients in a multitude of ways.”

Signing up is easy

Patients and caregivers will receive several communications over 3-4 months, however they choose: email, email and postal mail, as well as text.

These short, informative, and timely communications will:

Post Sign Up 

Welcome them to BE CONNECTED and explain what they can expect from the program

Day 14 

 Explain how to identify side effects and the importance of notifying your healthcare team immediately. A video for patients reinforces this information

Day 25 

Educate about how dosage adjustments are commonly used to help manage certain side effects

Day 40 

 Provide lifestyle and wellness tips including side effects management, staying active, leaning on friends and family, and more

Day 54 

Share contact information for support organizations specific to your patient's condition

Day 68 

 Encourage them to access downloadable resources to help with their treatment journey—such as a Patient Handbook, Treatment Journal, Side Effects Tip Cards, and more

And more 

This information is not a substitute for medical advice. It is educational support for patients and caregivers to help them on their treatment journey.
